Compound Cures Rheumatism.

the Only Medicine That Prevents a Return of the Terrible Disease.

Rheumatism, which does its terrible work in the muscles, joints and tissues, is caused by uric acid which gathers in the blood. To get rid of this poisonous acid which proces the irritations, pains, agonies, inflammations and swellings peculiar to rheumatism, Paine's Celery Compound should be used without delay. No other medicine gives such prompt, cheering and happy re sults. It is the only medicine that prevents a return of the dreaded disease. Paine's blood is quickly cleared of all irritating poisons, tissue and muscle are built up, and the digestive organs perfectly toned. Do not treat with indifference the slightest pumatic symptoms; the early use of tine's Celery Compound will save you ceks and months of suffering. Mr. S. D. Conway, St. Louis, Mo., was permanently cured by Paine's Celery Compound after repeated failures with other medicines and

physicians. He says: T am 64 years of age, and have lived in St. Louis 27 years, and all this time with the exception of three years I have served in the Engineers' Department as Inspector. Last winter I contracted rheumatism and was laid up. I tried all remedies and doctors, but all failed until I struck Paine's Celery Compound, which has made a permanent cure in my case. I have recom mended it to many, and they have used it

asked Judge Sidener of each of the witnesses.

All replied that they had not, whereupon the Judge announced that this was absolutely necessary to make a case, and discharged the prisoners, whose names appeared on the docket as follows: Henry Campbell, Louis Walton, George Gardner, Edward and George James, Bob Carleton, James Crow, George Ramsey, George Coursey, James Kelly, Tom Collins, Isaac Clay, William Necley, William Rothgen, George W. Bürnard, William Lee, Charles Hamilton, Albert Cates and John Johnson.

The police ciaim that Judge Sidener's ruling puts them at a great disadvantage, as they claim it is almost impossible for them to catch gamblers engaged in any kind of game in the act of tendering their money to one another.

Judge Sidener has made similar rulings in gambling cases before and holds that it is absolutely necessary for the police to show such evidence before he can fine players according to law.

WHITNEY AND GUGGENHEIM **BACK FROM THE SOUTHWEST**

They Bought Deeds to \$10,000,00 Worth of Silver, Lend and

Copper Mines.

New York, Nov. 24.—Harry Payne Whitney and Daniel Guggenheim have just returned to New York after a five weeks' trip to the Southwest, and with them they brought deeds to nearly \$10,000,000 in silver lead and copper mines in Colorado, Mexico and other points in the West and Southwest. Their trip extended to the City of Mexico and had as "way stations" St. points in the mining district of the West. More than a year ago William C. White ney announced that he had retired from business and would intrust his vast inerests to his son, but this is the first time Harry Payne Whitney has engaged actively in the details of the property which he will inherit some day. The party was com posed of the men who represent the capital behind the American Smelting and Refining Company, and the Guggenheim Exploring Company. They went West to perfect the consolidation of what is known as the 'Smelter Trust' for the former concern and to acquire new properties for the latter.

Mr. Guggenheim, in speaking of the trip

"Mr. Whitney evinced the greatest interest in the work and seemed to enjoy the most intricate details. He showed himself to be a young man who will take his place in the financial world."

Speaking of what was accomplished upon the journey, Mr. Guggenheim said: "For the Guggenheim Exploration Company we bought the Balerdinia mines at Durango, Mexico, for \$5,000,000, and arranged to spend \$1,000,000 in improvements so to spend \$1,000,000 in improvements so that we may produce 2,000 tons per day. These mines spread over a vast area and are in two groups. One group produces copper and another silver and lead. For the copper group we shall build a railroad forty miles long, and for the lead group a net of railways varying from five to ten miles.

"We also purchased the Vete Grande we also purchased the vete orange mines at Parrale, Mexico, which produce quantities of silver. These also will be de-veloped by railways. Both properties have been worked for more than 300 years, but it was by Spaniards, and accordingly Spanish methods. Our plan is to employ American engineers and American methods.

engineers and American methods.

"We also purchased the Titusville mines at Durango, Colo., and other properties in that district for \$2,00,000. We looked after our interests in the Missouri lead fields and mines in other parts of the West."
